

How we're responding to COVID-19

We're committed to maintaining the health and safety of our customers, employees and the communities we serve. We've taken a number of steps to increase safety measures and implemented new operational changes. And, we'll continue to do all we can to help navigate these uncertain times.

We're asking all of our employees to stay home if they have any cold symptoms, such as cough/sneezing/fever, or feel poorly.

We're requiring all of our employees to wear a face mask at all times while at customer locations and when interacting with co-workers, vendors and any customers or supply chain drivers at our facility.

We're practicing proper social distancing by maintaining at least 6 feet between each other.

Proper hygiene is important and we're re-enforcing the importance of proper hand washing, covering your nose and mouth when coughing or sneezing.

We've provided our employees with face masks and hand sanitizer to use frequently.

We've also re-enforced the importance of not touching your face, particularly eyes, nose and mouth with hands to help prevent the spread of this virus.

Our employees will clean all work surfaces and equipment we touch when at customer locations before we work on the equipment and also when we have finished.

We will minimize person to person contact as much as possible while still maintaining the high level of customer service our customers are used to.

If you have any questions or concerns about the procedures we've implemented, please do not hesitate to contact us.

Thank you for your continued business.
